

**Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

1. (Currently amended) An inner fin with cutout window for heat exchanger comprising:  
a plurality of protruding ridges each formed, by a wall portion having a cutout window, on front and rear sides of ~~the~~ a plate respectively and extending along a longitudinal direction of ~~a~~ the plate with a predetermined width[[]], said front side adjacent protruding ridges sandwiching a front and rear side grooves groove provided between said protruding ridges adjacent to each other and said rear side adjacent protruding ridges sandwiching a rear side groove to serve as passages of a heat exchange medium that are separated from each other by the wall portion; and  
a weir portion provided at a bottom of an entrance for the heat exchange medium in the cutout window so as to allow said grooves adjacent to each other to communicate with each other, the weir portion protruding from a bottom of said groove to promote diffluence and stirring of the heat exchange medium.
2. (Original) The inner fin with cutout window for heat exchanger according to claim 1, wherein said weir portion is formed on each of the bottoms of said grooves both on the front side face and on the rear side face of the plate.
